

SF Bay Collaborative Research Network

Spring 2025

A UCSF-supported partnership of community clinicians, practices, and researchers

Early Registration and Call for Abstracts: UCSF CTSI's Community Research and Action Meeting

Please join us for the day on September 9th, 2025. We will be hosting our Annual Meeting at William J. Rutter Center on the UCSF Mission Bay Campus from 8:30 am to 4 PM. Our theme this year is: **Supporting the Health and Safety of Our Community: What is the Role of Research?** The meeting will feature a topical debate and keynote addresses from UCSF leaders, community leaders, political leaders, and research funding agencies. The meeting is free and open to the public. **Register for the meeting [HERE](#). If you would like to submit an abstract, click [HERE](#).** For attendees who need it in order to attend, we are applying for free continuing education credits.

New Funding Opportunity: Research to Advance Racial and Indigenous Equity

The Robert Wood Johnson Foundation has just announced a new funding opportunity under its Evidence for Action (E4A) Program. Through this new announcement, they will award up to \$5 million in research grants support actionable, solutions-oriented health equity research. For more information, go to

<https://www.evidenceforaction.org/research-advance-racial-indigenous-health-equity>

Opportunity for primary care practices to participate in a study of patients with dementia and their caregivers.

About SFBayCRN

The San Francisco Bay Collaborative Research Network (SFBayCRN) is UCSF's primary health care practice-based research network, supported by the UCSF Clinical and Translational Science Institute. We offer free initial consultations on practice-based research issues for our members.

To learn more about SFBayCRN, please visit: <https://consult.ucsf.edu/sfbaycrn>

Michael Potter, MD
SFBayCRN Director

Saji Mansur, MPH
SFBayCRN Manager

develop a measure of caregiver burden that may impact future payment models. They need help getting this survey out to patients and their caregivers to determine the caregiver burden. Primary care teams can get paid to help identify patients and their caregiver, and the caregivers get paid to complete the survey. **If you are interested in learning more or participating in this project, please contact Jack.westfall@dartnet.info.**

A human research protections training program tailored to the unique roles of community research partners.

For those of you who are working with non-academic community researchers, we thought we would share this helpful resource from colleagues at the University of Illinois Chicago. The CIRTification program is aimed at non-academic community researchers, providing background and resources to support the translation of their unique skill sets. The training program is a valuable tool for those with basic or novice research backgrounds. **For more information, click [HERE](#).**

UCSF Implementation Science Two-Day Short Course – May 15-16, 2025

Some of you may be interested in this live, remote, one-of-a-kind opportunity to advance your understanding of the growing field of implementation science and workshop your own project. CME credit is available to participants who request it. For more information and to register, go to:

<https://epibiostat.ucsf.edu/implementation-science-short-course>
