

SF Bay Collaborative Research Network

Winter 2024

A UCSF-supported partnership of community clinicians, practices, and researchers

Four Important Studies Recruiting for

Participants

This quarter, at the request of some of our research colleagues, we are sharing opportunities for research collaboration and participation that may be of special interest to our community partners.

For Your Patients:

UCSF School of Nursing Digital Diabetes Prevention Study

This federally funded study aims to assess the effects and sustainability of a digitally based diabetes prevention program for adults with obesity. Patient participants will be asked to lose weight via lifestyle changes using an evidence-based smartphone app. The study pays participants a \$100 stipend and involves 4 to 5 office visits to the UCSF campus over the course of one year. To learn more about the study, follow this [link](#). For additional questions or information, please email mDPP.Study@UCSF.EDU.

For Community Health Center Clinicians and Staff:

Survey about Integrative, Complementary and Indigenous Therapeutic Approaches in Outpatient Safety Net Settings

We invite clinicians and staff from community health centers to take part in a short (5 - 10 minute) **online survey**, which seeks to understand whether and how clinics are providing integrative health services to their patients. Multiple people at the same organization can complete the survey. Respondents will receive results of the study when it is completed. Anyone with questions can reach out to the study team at: integrativesafetynet@ucsf.edu

California Digital Equity Access Survey

This study aims to understand digital equity access for patients across California's safety net health

SF Bay CRN eNews

Dear Friends,

We hope you are well and look forward to seeing some of you at our Annual Meeting on April 29th at UCSF's Mission Bay Conference Center. As you know from our past mailings, this year's theme is "Housing, Labor, and Health Care: Mapping the Future of Community Engaged Research and Action", featuring a day full of opportunities to network and learn. If you wish to join us and have not already registered, you may do so [here](#).

The San Francisco Bay Collaborative Research Network (SFBayCRN) is UCSF's primary health care practice-based research network, supported by the UCSF Clinical and Translational Science Institute. We offer free initial consultations on practice-based research issues for our members.

To learn more about SFBayCRN, please visit: <https://consult.ucsf.edu/sfbaycrn>

systems. Frontline clinicians or staff, community partners, local safety-net setting leaders, or digital navigators working in these settings are invited to participate in this study, funded by the California Healthcare Foundation. Participants will receive a \$10 e-gift card and/or a \$25 e-gift card for completing a virtual interview. You can view the project flyer [here](#) or access the survey with this [link](#).

Michael Potter, MD
SFBayCRN Director

Saji Mansur, MPH
SFBayCRN Coordinator

[For All Types of Healthcare Organization Leaders:](#)

National Digital Inclusion, Access, and Literacy Project

The goal of this survey is to understand whether and how clinics screen and assist patients who may face challenges with access and use of digital health tools for communication. Please do not take the survey if you know for certain that someone else from your organization has already participated in the survey. If interested, please complete the <10 min survey [here](#). You will be sent a \$10 Amazon gift card as a token of appreciation. Please contact the study coordinator, Andersen Yang, at andersen.yang@ucsf.edu with any questions.
